

## INPUT and OUTPUT DEVICES

Two important parts of a computer system involve:

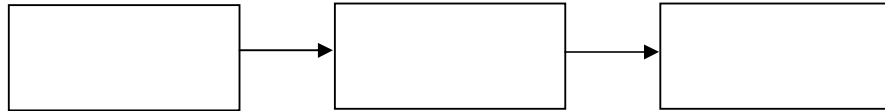

- getting data into a computer for processing
- being able to see/hear the results of that processing

Place the words:

**PROCESS**      **OUTPUT**      **INPUT**

in the correct boxes....

Here are some pictures of **input** and **output** devices. Remember the word **device** means a piece of equipment. Draw lines between a picture, its name and then whether it is an input or output device. One has been done for you.

Screen

Keyboard

Speakers

Printer

Touch Screen

Mouse

Camera

Microphone

Scanner

**INPUT**

**OUTPUT**

In this list you should have more input than output devices. If we were to carry on looking we would find many input devices and fewer output devices. Why do you think this is?

I think there are more INPUT devices than OUTPUT devices because \_\_\_\_\_
